Kuwait, Qatar, Taiwan, Singapore (Exp.)

⚠ WARNING

The service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt within this service information by anyone else could result in serious injury or death.

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by ⚠ in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

Usage	:	For repairs and change of spare part only for washing machine type Panasonic Model NA-F60A6 / NA-F70A6 / NA-F756A / NA-F70G6 / NA-F70G6P / NA-F70X6 / NA-F806X
Instructin for Usage	:	The work repair and changing of space part should be operated by a skilled technician from the distribution agents or Panasonic's Standard Service Center.
Warning	:	Switch off electrical power before commencing work to avoid a potential short circuit or injury.

1. ATTENTION IN THE REPAIR WORK SECURITY

In order to prevent any accident during repair work and ensure security of the product after repair work, somethings surely followed are explained below.

■ The level of the arised damages or dangers, when indicated contents are ignored, are classified by following indications and explained.

⚠	**Warning**	The content in the column of this indication is "Be assumed that possibly die or get seriously injured".
⚠	**Attention**	The content in the column of this indication is "Be assumed that possibly get damages or possibly only damaged object occured".

■ Types of the contents being followed are classified by following figured symbols and explained. (The following is an example of expression in pictures.)

⚠	This figured symbol means caution "**Attention**".
⃠	This figured symbol means must not do "**Prohibition**".
❗	This figured symbol means surely execute "**Instructions**".

⚠ Warning

Connection of cables should be done according to regular work.

- Connection of cables should be tightened reliably with strength using solderless terminal. (specified parts always using regular bonding plier)
- Install a fire protection cover (fireproof) covering connection area completely, and close opening area by tape. (Please reuse the fire protection cover which came with the product.)
- When drawing cables around, fixing those cables with cable suppression part. Do not touch rotating part, high temperature part and surface of metal.
- Be sure to replace with cable unit when any cable was snapped. When a part of the cable unit was cut you must not do the connection repair. It may be the cause of smoke, ignition or receiving an electric shock.

Be careful about receiving an electric shock.
When doing electric connection service such as voltage measurement, please be careful enough about receiving an electric shock at electric charging parts and cable terminal parts.

Pull out electric plug when doing repair work.
Disassembling, assembling and replacing parts should be done after pulling out electric plug. Receiving an electric shock or getting an injury may occur.

Be sure to use specified parts.
Always use specified parts for the parts with mark ⚠ in the electric circuit diagrams and parts list. It may be the cause of smoke, ignition or damage.

Do not touch any rotating object with hand unless it stops completely.
Slow rotation may also roll in your hands and cause injury.

Rebuilding is prohibited.
Do not reguild machine parts and components when repairing service. It may be the cuase of damage or ignition.

Straightly pull out or insert in huasuton terminal.
Do not twist it.
It may be the cause of damage or ignition.

⚠ Attention

Please wear gloves when disassembling, replacing and assembling.
Always wear gloves to prevent an injury by the metal end face or an electric shock at the time of the electricity service.

Please be careful to the edges of the metal end face.
Wear the working clothes of long sleeves to prevent an injury by the metal end face or replease work after covering the end face with tape or towel.

3. FEATURES AND TECHNICAL INFORMATION

3.1 Product special feature

■ NA-F60A6

Program	Time
Normal	Approx. 40 - 59 min
Speedy	Approx. 37 - 53 min
Delicate	Approx. 23 min
Tub Dry	Approx. 36 min
Soak 1 hour	Approx. 61 min
Soak 3 hour	Approx. 179 min
Soak 8 hour	Approx. 471 min

- Pre-wash weight sensor.
- Dial indicating detergent level after sensing wash level.
- Pre-set timer.
- Fabric softener dispenser.
- Detergent dispenser.
- Automatic power-off when finish.
- Dial indicating unusual sign (LED will blink).
- Overflow sensing device.
- Dial indicating time remaining.

■ NA-F70A6 / NA-F756A / NA-F70G6 / NA-F70G6P

Program	Time
Normal	Approx. 40 - 59 min
Speedy	Approx. 21 - 37 min
Delicate	Approx. 24 - 29 min
Tub Dry	Approx. 36 min
Soak 1 hour	Approx. 100 - 119 min
Soak 3 hour	Approx. 219 - 238 min
Soak 8 hour	Approx. 511 - 530 min

- Pre-wash weight sensor.
- Dial indicating detergent level after sensing wash level.
- Pre-set timer.
- Fabric softener dispenser.
- Detergent dispenser.
- Automatic power-off when finish.
- Dial indicating unusual sign (LED will blink).
- Overflow sensing device.
- Dial indicating time remaining.

Program	Time
Normal	Approx. 46 - 60 min
Mini	Approx. 15 min
New Speedy	Approx. 37 - 53 min
Blanket	Approx. 47 - 55 min
Delicate	Approx. 23 min
Tub Hygiene	Approx. 150 min
Soak 1 hour	Approx. 61 min
Soak 3 hour	Approx. 179 min
Soak 8 hour	Approx. 471 min

- Pre-wash weight sensor.
- Dial indicating detergent level after sensing wash level.
- Pre-set timer.
- Fabric softener dispenser.
- Detergent dispenser.
- Automatic power-off when finish.
- Dial indicating unusual sign (LED will blink).
- Overflow sensing device.
- Dial indicating time remaining.

3.2 Weight sensor

The weight is sensed by the moving force of the Pulsator, which changes a capacitor pole and releases a signal wave. The wave is changed into a pulse number from which the clothes weight is sensed. Prior to weight sensing for Normal and Strong program, the machine runs without water by spinning the Pulsator to left and right for 4.2 seconds (ON 0.3 second - OFF 0.4 second). The motor stops (OFF), a water system counts the pulse number, then calculates the accumulated pulse numbers for drawing water into the tub over a defined level. The dial will indicate High wash level.

3.3 Function control with fuzzy sensor

Clothes quantity checking, wash level indication and detergent consumption indication with Fuzzy Logic System.

Turn Switch "ON"

Press "Start" button

1. Check clothes quantity
2. Check ambient temperature

A. Check clothes quantity
B. Control wash time
C. Control spin time

Supply water to a proper level

WASH

RINSE

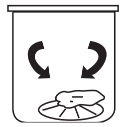

SPIN

Switch will automatically cut the power current "OFF"

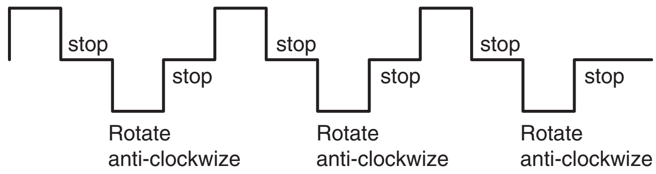

1. Check clothes quantity and specify the amount of detergent.

< Checking Method >

Check cross pressure at the capacitor while the Pulsator operates without water.

< Motor Status >

2. Temperature checking.

Check temperature in the atmosphere when the machine starts. In case of low temperature, wash timer and spin timer are extended automatically, so that washed clothes are as clean as washing in high temperature.

1. Wash timer and spin timer with checked clothes quantity.

	High 3.0 Kg and more	**Medium 1.2 Kg ~ 3.0 Kg**	**Low 0 Kg ~ 1.2 Kg**
Wash Timer	12 min	12 min	9 min
Spin Timer	6 min	6 min	5 min

2. Additional wash timer and spin timer as temperature increases.

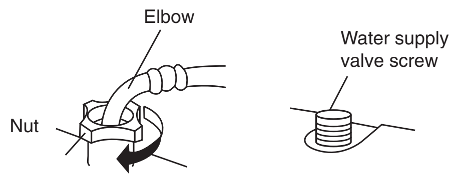

External Temp.	**25°C**	**15°C**	**5°C**	**30°C**
Wash Timer	+0 min	+2 min	+3 min	-1 min
Spin Timer	+0 min	+1 min	+2 min	+0 min

4. INSTALLATION

4.1 Checking of placement

Connect the water supply hose to the water supply valve screw.

1. Push the water supply hose nut straights onto the water supply valve screw.
2. Hold the elbow bny lifting it up, screw the nut onto the water supply valve screw, and firmly tighten the nut.
3. After the nut is tightened, check whether or not the elbow is unsteady or loose.
4. After tightening, open the faucet to confirm that there is no water leakage.

[Cautions]

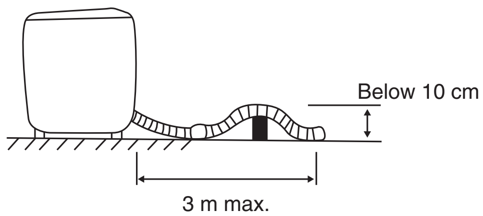

Firmly tighten the nut, otherwise water leakage will result.

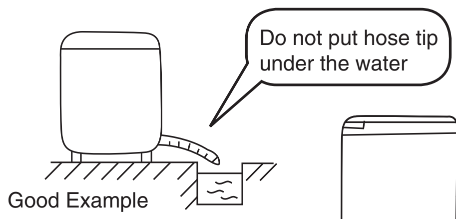

Water Pressure Rating :

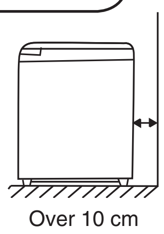

$2.9 \times 10^4 \sim 9.8 \times 10^5$ Pa

Hose extension

If extended external part is necessary when connecting the drain hose, the length of the drain hose should be less than 3 m and the height should be below 10 cm.

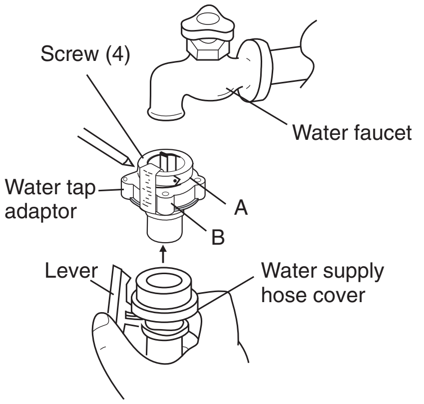

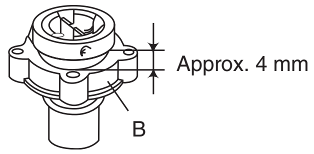

Install the machine 10 cm or more away from the wall.

4.2 Connect the water supply hose

[Note]

- Firmly tighten part B of the water tap adaptor, otherwise, water leakage will result.
- When the hose must be reinstalled (after you remove). For example, turn B to the left until about 4 min., of the thread becomes visible, then carry out the procedure described above.

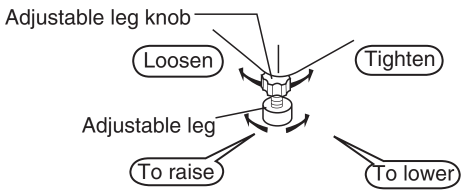

- If a water tap adaptor is already connected, replace with the attached new one.

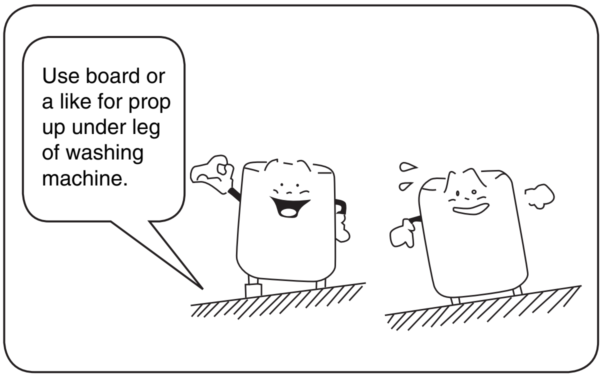

4.3 Install washing machine to steady

Adjust height of leg

1. Turn the adjustable leg knob towards (Loosen) direction to loose it.
2. Turn the adjustable leg to adjust the levelness.
   2.1 When increasing height, turn adjustable leg towards (Loosen) direction.
   2.2 When decreasing height, turn adjustable leg towards (Tighten) direction.
3. Turn the adjustable leg knob towards (Tighten) direction to tighten it.

If the floor is largely inclined.

4.4 Child Lock program

Press the [POWER OFF/ON] button for at least 5 seconds. The buzzer sounds (2 times for setting) and the [CHILD LOCK] indication turns on.

Less than 10 sec.: Buzzer on → Open lid → (Buzzer on) → Close lid → Buzzer off

More than 10 sec.: Water drain → Buzzer on and abnormal alarm → Unplug the power cord from the outlet and re-plug it again after 5 seconds

5. OPERATIONS PANEL

5.1 NA-F60A6 / NA-F70A6 / NA-F756A / NA-F70G6 / NA-F70G6P

Fuzzy logic control is used to recommend the proper water level and amount of detergent for the amount of laundry being done.

RESERVE

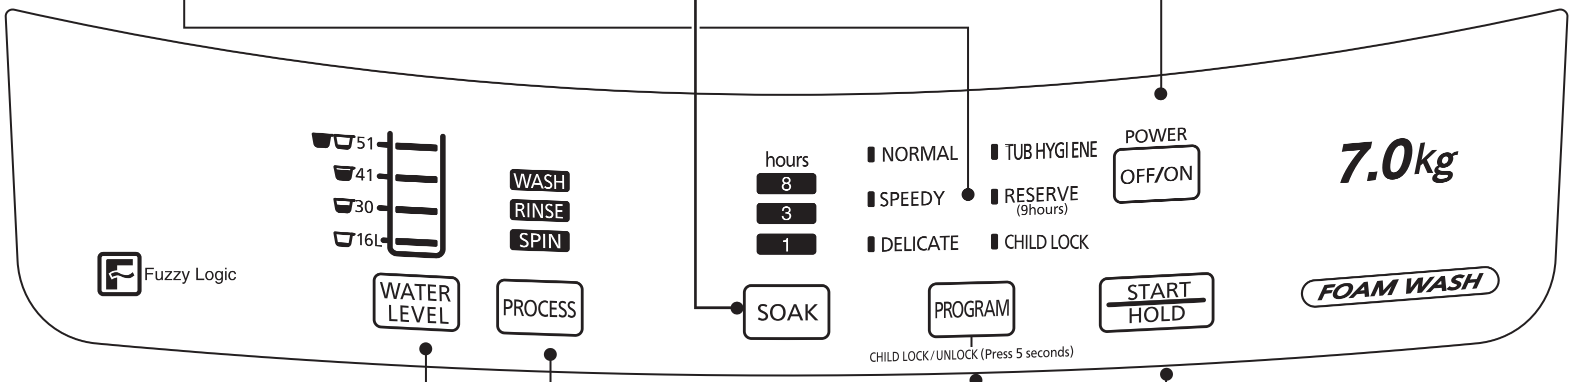

- You can choose the finishing time to 9 hours.

SOAK

- Operations course for heavily washed laundry.
- You can adjust soak time based on the condition of dirt.
- You can choose your soak time from 1, 3 or 8 hours.

OFF/ON

- The power automatically turns off when total operations is finished.
- The power automatically turns off if [START/ HOLD] button is not pressed within 10 min after turning on the power.

START/HOLD

- Press this to start.
- Press this to stop in the middle of the cycle.

WATER LEVEL (Water Volume Display)

- The appropriate WATER LEVEL for the size and type of your laundry will be displayed.
- You can adjust the WATER LEVEL according to your desired level.

PROCESS

- Press to select WASH only, WASH and RINSE or other individual functions.

PROGRAM (Course Select)

- According to type of laundry and stain, you can select suitable course yourself.

Caution : If you need to change the [PROGRAM] and [SOAK] settings after the cycle has already started, turn the power off and on it back.

5.2 NA-F70X6 / NA-F806X

Fuzzy logic control is used to recommend the proper water level and amount of detergent for the amount of laundry being done.

RESERVE

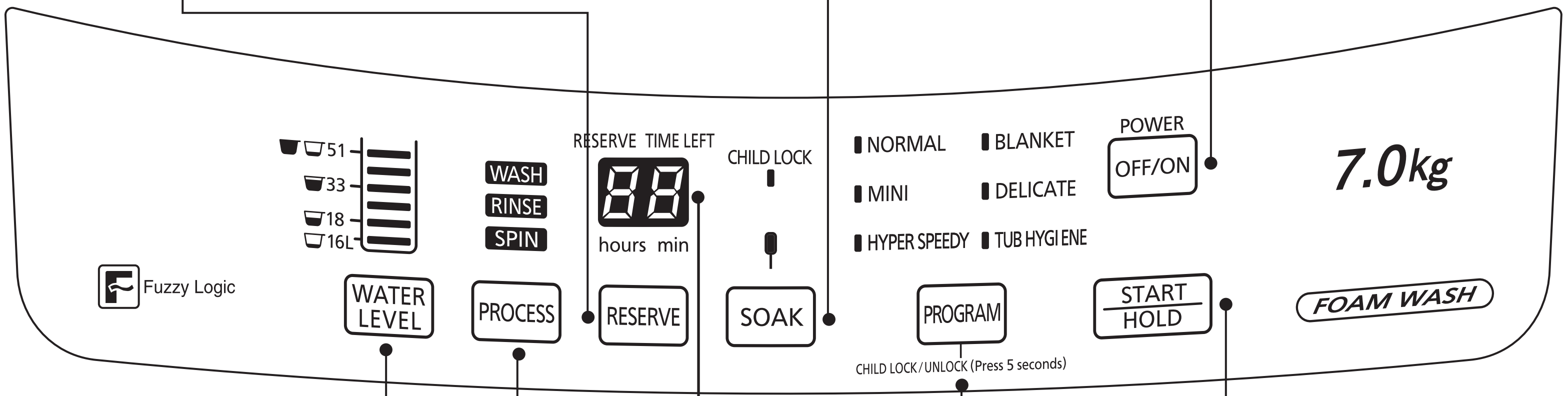

- Press the [RESERVE] button to set how many hours later you would like the wash to be completed.

SOAK

- Operations course for heavily washed laundry.
- You can adjust soak time based on the condition of dirt.
- You can choose your soak time from 1, 3, 5 or 8 hours.

OFF/ON

- The power automatically turns off when total operations is finished.
- The power automatically turns off if [START/ HOLD] button is not pressed within 10 min after turning on the power.

WATER LEVEL (Water Volume Display)

- The appropriate WATER LEVEL for the size and type of your alundry will be displayed.
- You can adjust the WATER LEVEL according to your desired level.

PROCESS

- Press to select WASH only, WASH and RINSE or other individual functions.

TIME DISPLAY

- When the machine is in operation, the time display shows how much time (in minutes) is left.
- When the programmable timer has been set, this display shows how much time is left until the wash is finished by pressing the [RESERVE] button.
- Timer indication on the panel will show longer timer than selected time as it includes water feeding, draining, etc.

START/HOLD

- Press this to start.
- Press this to stop in the middle of the cycle.

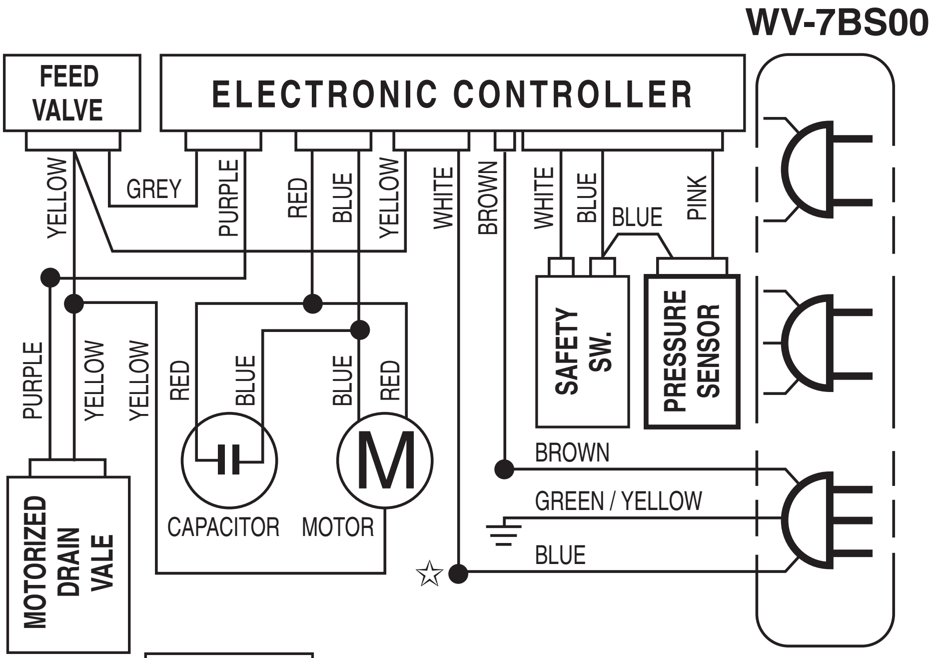

PROGRAM (Course Select)

- According to type of laundry and stain, you can select suitable course yourself.

Caution : If you need to change the [PROGRAM] and [SOAK] settings after the cycle has already started, turn the power off and on it back.

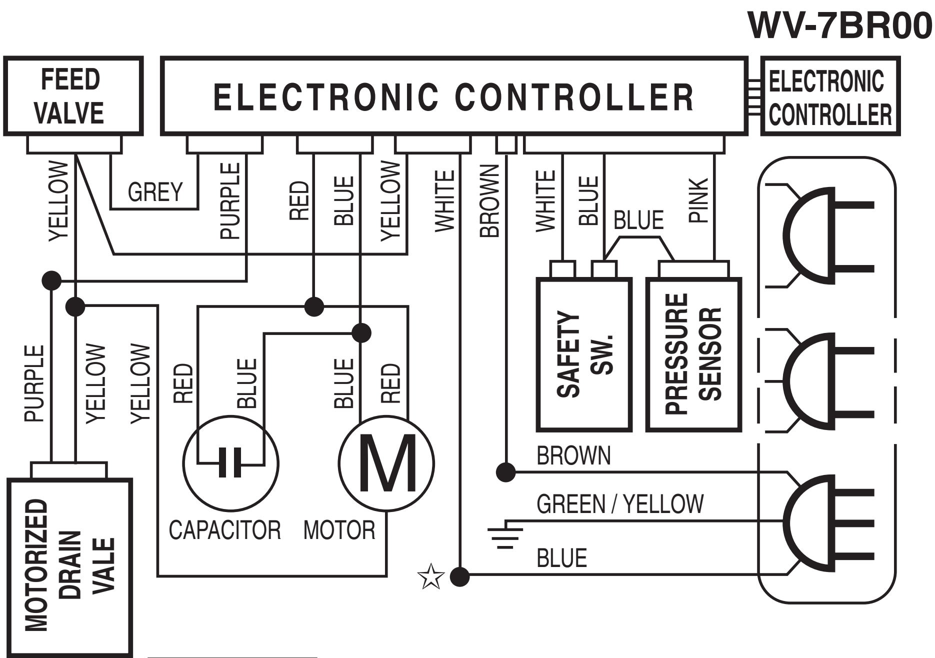

6. WIRING DIAGRAM

6.1 NA-F60A6 / NA-F70A6 / NA-F756A / NA-F70G6 / NA-F70G6P

☆ CAUTION : DIFFERENT COLOUR CONNECTION

6.2 NA-F70X6 / NA-F806X

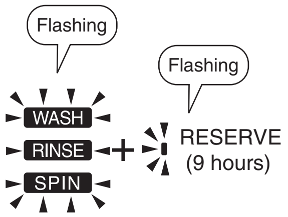

☆ CAUTION : DIFFERENT COLOUR CONNECTION

7. TABLE OF ERRORS

7.1 Case of buzzer alarm

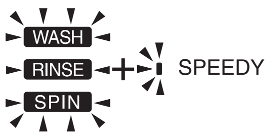

■ Check if abnormalities listed below are seen in the external water hose.

- Is the hose connected?
- Is it clogged with lint?
- Is it crushed?
- Is the tip soaked in water?
- Is a part of hose at a height of over 10cm midway?
- Is the extension hose longer than 3m?
- Is the hose lay down?

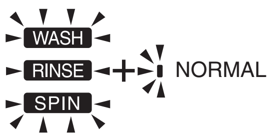

After open and close of the lid. Operation will restart.

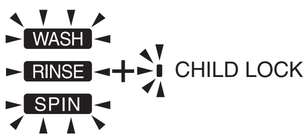

- Check if the lid is opened.
  ➡ Close the lid.

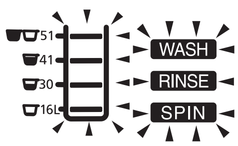

- Is the laundry unbalanced?
  ➡ Even it out.
- The machine is rattling. Is it inclined toward the floor?
- Is the adjustable knob loose?
  (Adjust the machine, so it does not jiggle, then tighten the adjustable knob)

- Check if you have forgotten to connect the water hose and to turn on the faucet.
- Check if the connection of the water supply hose is clogged with dirt. Please refer to “Maintenance” (Water supply hose filter)
- Check lif the water supply failure.

- Check if the lid open more than 10 seconds after start of water feeding.
- [CHILD LOCK] mode will activated to force the water drain.
- Pull out power plug from the socket outlet and replug it after 5 seconds.
- Please refer to “[CHILD LOCK]” program.

- The buzzer does not sound.
- Pull out the power plug and request for service.

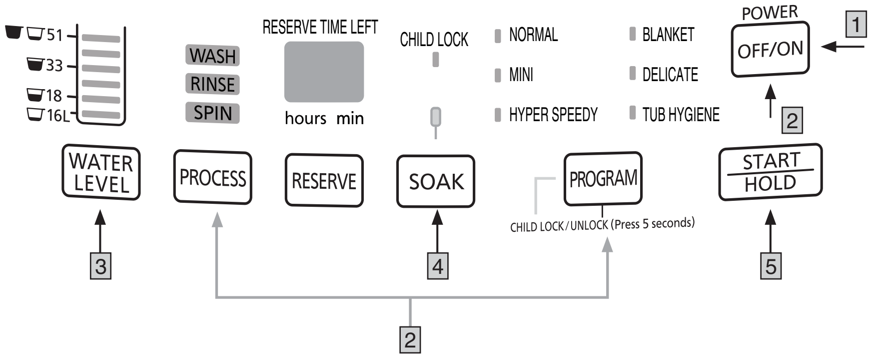

7.2 Error Indication

If the following indications appear on the display panel (buzzer sounds, U and H characters appear).

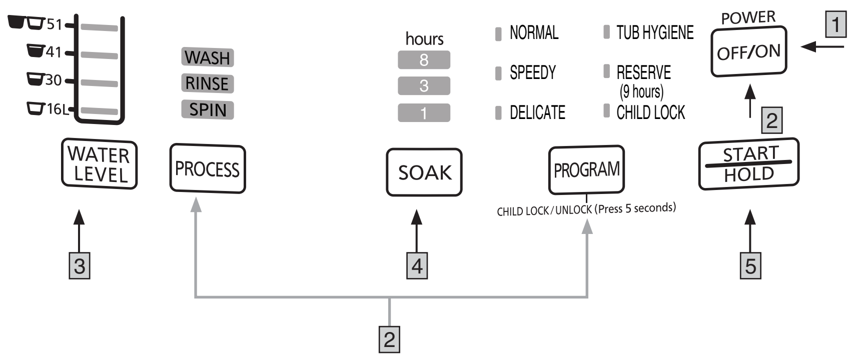

U11	• Check if abnormalities listed below are seen in the external water hose. • Is the hose connected? • Is it clogged with lint? • Is it crushed? • Is the tip soaked in water? • Is a part of hose at a height of over 10cm midway? • Is the extension hose longer than 3m? • Is the hose being used too small? Restart with opening and closing the lid.
U12	• Check if the lid is opened. • Close the lid.
U13	• Is the washing machine is an unsteady position, or is it on an inclined floor surface? • Is the laundry unevenly distributed in the tub? • Arrange the laundry evenly in the tub, then close the lid.
U14	• Check if you have forgotten to connect the water hose and to turn on the faucet. • Is the water supply cut off? Restart with opening and closing the lid.
U99	• Check if lid is open when draining operation of the [CHILD LOCK] program is ON.
H01	• In case of H displays such as “H01”, with no buzzer sounds pull out the power plug, and contact your dealer for service.

7.3 Setting after U11 happen

NA-F70X6 / NA-F806X

1. Set to power switch to “OFF”.
2. Press [PROCESS] + [PROGRAM] and POWER [OFF/ON] button 1 time.
3. Press [WATER LEVEL] button 3 times.
4. Press [SOAK] button 2 times (WATER LEVEL 6 mm. up).
   Remark : Indication on LED from 3B to 39.
5. Press [START/HOLD] button 1 time.

1. Set to power switch to “OFF”.
2. Press [PROCESS] + [PROGRAM] and POWER [OFF/ON] button 1 time.
3. Press [WATER LEVEL] button 3 times.
4. Press [SOAK] button 2 times (WATER LEVEL 6 mm. up).
   Remark : After change light will be indicate on WASH and TUB HYGIENE.
5. Press [START/HOLD] button 1 time.

TAP	SOAK	PROCESS
1	3 mm. up	3 mm. down
2	6 mm. up	6 mm. down
3	9 mm. up	9 mm. down
4	12 mm. up	12 mm. down

Note : If water level is higher or lower, please adjust water level.

8. TROUBLESHOOTING

8.1 Table of troubleshooting

Problem (have to check)	Corresponding device	Control panel	Water Inlet Valve	Water level sensor	Safety switch	Gear motor	Capacitor	Mechanism case	Holding spring	Packing valve	Others
Machine does not work	No light at the dial	0									
	Dial light is on	0	0								
Unusual amount of water inside machine	No sound of water from inlet valve	0	0								
	There is sound of water from inlet valve										Check water supply
	Not enough water flow										Check water supply
	Water never stops flowing in	0	0	0							
Washing system does not work	Pulsator does not spin (no sound of motor)	0									Motor
	Pulsator does not spin (there is sound of motor)						0	0			Belt, Motor
	Pulsator spins only one way	0						0			Pulley Motor
	Pulsator spins slowly	0									Belt, Motor
Unusual draining	No draining	0									
	Drains slowly	0				0				0	
Unusual spinning system	No spinning (no soud of motor)									0	
	No spinning (Pulsator spins)	0			0						
	No force in spinning (tubspins slowly)							0			
Unusual loud noise	Loud noise during washing										Belt, Motor
	Loud noise during dry spinning							0			Check installation
Water leak	Water leaks from drain pipe							0	0		Something clogged
	Water leaks at the bottom of machine										Drain pipe A, Pulsator
Incorrect working	Water is supplied during spinning										Unbalanced tub, leaning
	Rinses more than 3 times				0				0		Unbalanced tub, leaning
	Pulsator spins despite no water				0						Air pipe clogged
	Cannot change function program	0		0							Description of usage
	Water does not flow out of a filter										Description of usage
	No overflow during water filling as rinsing										Description of usage
	Selected washing program cannot be memorized										Description of usage
	Fabric softener flows away too fast										Description of usage
	Pulsator spins in short range as washing and rinsing										Description of usage
	Works at low wash level then supplies water again										Description of usage

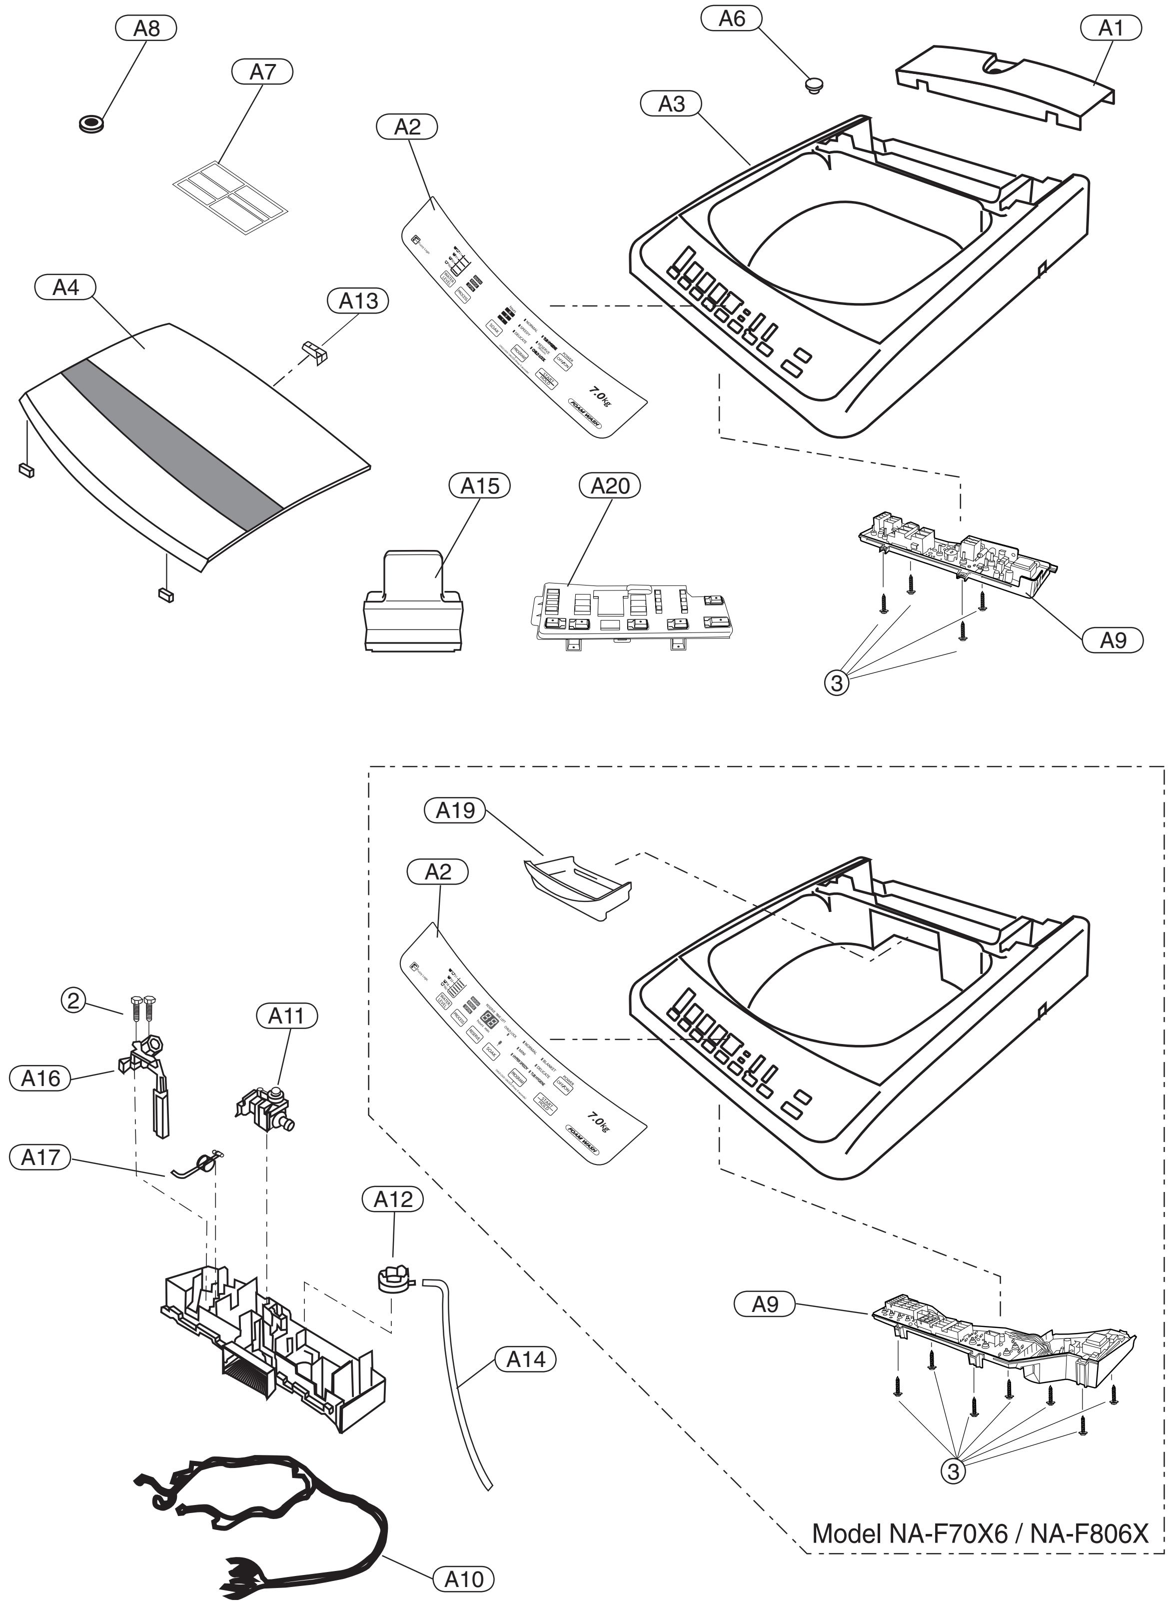

8.2 The following symptoms are not trouble.

Symptoms	Causes
Machine begins filling water in the middle of the wash.	• When the laundry amount is large at the HIGH water level, the machine sometimes fills automatically. When level goes down, the machine fills automatically.
The water level is too high for the amount of laundry being washed.	• When the laundry is already soaked with water before the wash is started, or if there is water in the tub before the wash is started, the water level will sometimes be higher.
The water level is too low for the amount of laundry being washed.	• With light laundry made of synthetic or blended fabric, the water level will sometimes be lower.
Midway during spinning, the operation suddenly changes to rinsing.	• When the laundry is unbalanced during spin, rinsing and automatic correction of unbalanced laundry will begin. Later spinning will return to normal condition.
Water does not flow through the lint filter. Double Cascade does not operate.	• When the water level is set to very low, water sometimes will not flow through the lint filter. Double Cascade does not operate when these settings have been selected.
Softener spills out from softener drawer.	• Keep the level of the softener indicated to prevent the softener from flowing immediately. • If you close the softener drawer forcefully, softener may spill out of the drawer.
During draining, the laundry and the spinner rotates with irregular movements.	• To suppress soap suds build-up, the washing tub turns slowly and quickly.
The buttons do not work.	• Only the [WATER LEVEL] button is available after the machine begins washing. • To change the setting, press the [START/HOLD] button or press the [POWER OFF/ON] button and reconfigure the setting.
If you start with the rinse cycle, the tub is not filled with water.	• When there is water in the tub, the operation starts with the draining. After spin cycle is finished, the tub will be filled with water.
Washing machine does not run at all.	• Check if there is power failure. • Check if the power fuse has blown out or the breaker is actuated. • Check if the power plug is plugged in thoroughly. • Check if the “Power” switch has been pressed. • Has the water faucet been turned on? • Check if the [START/HOLD] button has been pressed. • Has the machine been programmed under [RESERVE] timer?

Symptoms	Causes
Machine begins filling water in the middle of the wash.	• When the laundry amount is large at the HIGH water level, the machine sometimes fills automatically. When level goes down, the machine fills automatically.
Water is not supplied.	• Check if the water faucet is turned on. • Is the water supply cut off? • Check if the connection of the water supply hose is clogged with dirt. • Check if the lid is opened. Close the lid.
Washing operation still continue even though the expected finishing time had passed on Reserve Program.	• Washing time will be longer because of laundry unbalance, water feeding and draining condition.
Buzzer sounds followed by a draining when opening the lid during wash and rinse.	• In the case when open the lid after setting the [CHILD LOCK] mode, it will force the draining process. Pull out power plug from the outlet and replug it after 5 seconds.
Tub shaking with the sound of water.	• This is the sound of the liquid to maintain the balance during spinning.
Water supply failure.	• Normally after the water supply failure, the water will become muddy. Detach the water feeding hose and turn on the water faucet to release to due muddy water. Fix water hose and start washing.
